## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tokoro et al (20020167865) in view of Baur et al (6705601). The reference discloses a balance spring 30 made of carbon (Par. 014, line 1) for a balance wheel 20. The thermal expansion and thermal elastic coefficient specifications are not set forth In the reference. However, it is known from Baur et al that the frequency of the balance spring oscillator in timepieces is dependent on temperature variations which affect the thermoelastic coefficient of the spring as well as well as the thermal expansion of the spring and balance (col. 1, lines 18-24). Patentee further suggests at col 1, lines 63-67 that to correct for temperature changes, the thermoelastic coefficient and the coefficient of thermal expansion of the spring is adjusted in relation to the thermal expansion coefficient of the balance to compensate for these changes. Consequently, it would be obvious for one skilled in the art to select these coefficients in the balance spring and

Art Unit: 2833

balance of Tokoro et al in such a way as to compensate for thermal variations of the system, as suggested and well known from Baur.

2. Applicant's claim for priority is acknowledged. The US/RO is being contacted to retrieve the certified copy of priority document from the international application and place a copy in this application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vit W. Miska whose telephone number is 571-272-2108. The examiner can normally be reached on M-F 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, P. Bradley can be reached on 571-272-2001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
